

DUNGAN AND SMITH APPEAL FOR ADDED U.S. AID

New Jersey Higher Education Chancellor Ralph A. Dungan and ECC President J. Harry Smith addressed the House Appropriations Subcommittee on Labor, Health, Education and Welfare last month on the need for increased federal funding for colleges and universities.

In his testimony, chancellor Dungan urged an increase in the basic opportunity grants program from the \$475 million proposed by the Nixon Administration to \$700 million. The higher figure, he said, would serve approximately 1,250,000 students with grants ranging from \$500 to

\$800.

President Smith urged that two-year community colleges be given separate consideration in preparing the new budget. He noted that schools like Essex County College played special roles in the education by handling students whose backgrounds in many instances were unlike those of their university counterparts. Mr. Smith emphasized the added burden that colleges like Essex had in enhancing such basic skills as reading, writing and math in students who are given "counterfeit diplomas" from high school.

POLAND TOUR SET FOR THIS SUMMER

Four members of the Essex County College faculty have been chosen to participate in GT 70's community college summer seminar in Poland. Ann Marie Alban of Instructional Resources, Howard Potteet and Florence Staats of the Humanities Division, Ned Wilson of Social Sciences will be among the twenty-five to spend eight weeks of study at Jagellonian University founded in 1364 in Cracow.

The project seeks to expand the scope of community college students by acquainting them with another culture through faculty selected to observe and study abroad. The instructional resources and impressions acquired during the seminar are expected to

result in course modification and render a broader scope of interest and objectivity to those participating. While in Cracow, the seminar will cover the topics of Polish history, literature, art, folk art, music and theatre, with time specially allotted for the assignment of projects and individual research. Cracow is an ancient cultural center and one of the few Polish cities to escape serious war damage.

The twenty-five participants were selected from faculty and staff holding full-time positions in those institutions with either a regular membership in GT 70 or associated with the organization on previous projects. The selection process

SMITH HEADS

SEARCH FOR

ESSEX WARDEN

In announcing the appointment, Freeholder Director Thomas H. Cooke Jr., cited the freeholder's choice as being based on Mr. Smith's association with the state Prison Reform Commission and his hand in preparing some of the innovative programs now in operation at the minimum-security institution during the past 18 months.

Mr. Smith has stated that the committee wants to set no limitations to find the best person and that he felt that "with most of the improvement that's taken place up there, we're looking not so much for an innovator, but for someone who'll keep within the philosophy that's been created there."
